

Roastilino

from

Savour your coffee making prowess.

The hypnotic, award-winning Roastilino-
an innovative counter top coffee roaster.

Roastilino

ROASTS UP TO 250 GRAMS OF GREEN BEANS PER CYCLE.

Fracino, the UK's only manufacturer of espresso and cappuccino coffee machines, introduces the award-winning Roastilino, an innovative counter top coffee roaster. This hypnotic sales tool meets and exceeds the demands of our increasingly sophisticated coffee culture, propelling the art of espresso making to new heights. The revolutionary roaster is an essential for coffee bars and venues promoting their Barista's artistry and coffee making excellence.

The roasting process is an aesthetic and sensory delight. The engineering innovation enables small quantities of green beans to be roasted on a bed of hot air in a glass chamber. Roastilino's mesh covered vents enable the delightful and enticing aromas of freshly roasted coffee to permeate the air. The theatrical delight sees the beans dance in the hot air while undergoing a mesmerising transformation from green – to lightly roasted hazelnut – and finally to a shade of rich brown.

Key Features

- Top quality mirror finished stainless steel that shines like polished chrome.
- Manufactured with the finest materials, latest machining methods and state-of-the-art electronic and safety components.
- Attractive coffee bean shaped touch pad with four programmable roast times of up to 10 minutes at a temperature of 200-230°C.
- Roasting process draws on fluid bed technology.
- Special L.E.D display for roast times countdown.
- Temperature control to ensure maximum temperature set is not exceeded allowing constant roasting of beans.
- Spigot for air extraction via ducting available as an optional extra (ducting tube not included)
- Jug manufactured from borosilicate glass.
- Unique patented jug clamping mechanism and automatic micro switch 'cut out' safety feature.
- Side opening husk drawer.

Technical Specifications

Height	Width	Depth	Element Rating/ Power Supply	Maximum Roast
605mm	285mm	400mm	13kw/13amp	250g

NOTE: The Roastilino must stand on a hard surface. Extraction may be required. Certification obtained for CE, KTL and GOST.

Grinder

K8

The K8 grinder is designed to grind roasted coffee beans on demand, in order to obtain the freshest and best quality coffee possible. Quick and easy operation through a single or double timed dose can be obtained at the precise level of coarse or fine coffee desired by the user.

Technical Specifications

Height	Width	Depth	Hopper Capacity	Motor HP/RPM/Watt	Weight
660mm	210mm	380mm	1.9kg/550g	0.50/1350/350w	15.2kg

This grinder has electronic features for gramme dispense and 1/2 shot volumes as well as grinder blade adjustment. 83mm burr blades produce a 2.5 second timing for a 7g dose dispense.
